

# INDOOR CYCLE ICR50 *Limited Edition*

**MATRIX**  
FITNESS

## Studios training for your home

The ICR50 Indoor Cycle in the Limited Edition offers exercisers a solid basis for ambitious and motivating workouts.

Via Bluetooth FTMS, athletes can connect to their favorite fitness apps like atZone or Kinomap and use them during workouts thanks to the integrated smartphone holder.

The intuitive four-way adjustment of the handlebar and the saddle allows everyone to find their suitable training position. The closely spaced pedals ensure the optimal position of hips, knees and feet for an authentic bike feeling. In addition, the handlebar offers a variety of grip possibilities for different training phases. The integrated bottle holder enables a sufficient supply of fluids during the workout.

## Precise resistance

The resistance lever allows quick and precise adjustments in 11 steps and simultaneously serves as an emergency-stop.

At the same time, the maintenance-free magnetic resistance enables instant, smooth adjustments and always ensures a pleasant driving experience and absolutely quiet performance.

## Rear drive with aluminum flywheel

The flywheel mounted at the rear not only looks particularly good, but also protects sensitive components from sweat and therefore extends the lifespan of the bike.

Due to the dual pedals with SPD click system and baskets can be optionally trained with special cycling shoes (SPD click system) or common sports shoes.
